

# Give your business the benefits of online transaction processing and data analytics with less hassle and delay

Dell EMC Ready Solutions for Microsoft SQL is a streamlined solution for your database applications

Dell EMC™ Ready Solutions for Microsoft® SQL provides the storage density and compute power necessary to give users the service they demand and support better-informed business decision-making. It also lets you start reaping these business benefits quickly by eliminating the time and worries of designing, configuring, and testing hardware yourself. See how a small wholesaler could benefit from Dell EMC Ready Solutions for Microsoft SQL:

### Business need:

Strong online transaction processing performance to help the sales team respond to customers in real time

**Support the user experience**

**14,049 online transactions per second**

### Business need:

Strong online analytical processing performance to help the company leaders make data-driven decisions

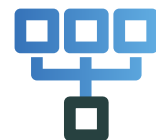

**Draw insights from information**

Process **48 separate 300GB** database query sets in **46 minutes**

**48,391 IOPS** with **4,857 MB/s throughput**

### Business need:

A database server-and-storage solution that packs a great deal of compute power into a small package

**Use datacenter space efficiently**

with a cluster that can handle **8 VMs doing heavy OLAP analytics** or **12 VMs processing robust OLTP requests**
