

Preserve Oracle Database 12c user response time while ensuring data availability

Dell EMC™ VMAX™ 250F all-flash storage and Dell EMC PowerEdge™ servers uphold performance of I/O-intensive Oracle® Database 12c workloads and provide high availability

Fast response time for users

Average storage latency of a millisecond or less keeps your users accessing data at the speed of business

One array for simultaneously active workloads

Running production and test/dev environments, created from VMAX snapshots, doesn't affect workload performance

Continuous data access for applications

SRDF®/Metro offers a highly available active/active configuration for high availability to maintain uptime and application performance
